# We Enable Freedom Through Software.

SteelDome was founded with the core principle of safeguarding and preserving data in the face of countless threats. By harnessing robust software and the capabilities of both public and private cloud resources, we unlock a remarkable opportunity to deliver enterprise grade data protection, while benefiting from the efficiencies of scale.

Every SteelDome product is crafted with design principles that seamlessly blend simplicity, security, and the most cutting-edge software technologies available in the present day. This amalgamation results in a potent data protection solution, applicable to data of any size or complexity.

## Our Mission

### To Democratize Data Solutions.

“Our mission is to provide enterprise-grade solutions for companies of all sizes. Whether you're protecting a few terabytes or petabytes, your data matters and is essential to your business. We've made technology traditionally reserved for large enterprises—requiring big budgets, extensive teams, and specialized expertise—accessible to everyone.”

Tony Franchi, CEO and Founder

## Why SteelDome?

We are at the forefront of enterprise storage, virtualization and data protection solutions. With a relentless focus on innovation, we address the complexities inherent in traditional infrastructures, offering businesses a gateway into the next-generation with cost-efficient, feature-rich, enterprise-grade solutions that redefine the way data is stored, managed and protected.

In today's rapidly evolving digital landscape, the need for robust data solutions has never been more critical. Yet, traditional approaches often entail significant investment, always undergo a rip-and-replace lifecycle, and are coupled with complexities in deployment and management. SteelDome disrupts this paradigm with its cutting-edge software solutions which free your organization from the limits of legacy technologies.

## Solutions

### Enterprise Storage

SteelDome's StratiSTOR delivers secure, resilient, enterprise-class cloud storage across any combination of systems.

### Enterprise Virtualization

Unlock the transformative potential of virtualization for your IT infrastructure with SteelDome's StratiSERV

### Backup & Recovery

SteelDome's InfiniVault offers secure protection against cyber threats and provides backups for any data set. Easily deployed on any infrastructure.

# SteelDome Products

## StratiSTOR™

Software-Defined Storage Cluster

- Eliminate Rip-and-Replace
- Eliminate Migration Cycles
- Eliminate Future Capacity Concerns
- Eliminate Future Performance Concerns
- Rapid Provisioning, Deployment and Expansion
- Hardware Agnostic
- Support for VMs and Containers

1 Store

## StratiSERV™

Hypervisor and Management Platform

- Web-based interface
- Centralized Management
- Enterprise Grade
- Simple Licensing
- Redundant
- Backup Capabilities
- VMs and Containers
- Hardware Agnostic

2 Compute

## InfiniVault™

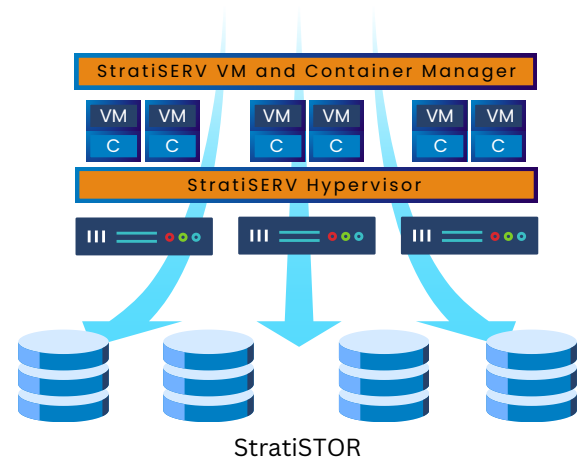

Virtual Data Protection and Backup Platform

- Fully provisioned and managed
- Completely software based
- Cloud backed with no egress fees
- Static and affordable monthly cost
- Nothing to learn or operate
- Scale on-demand to unlimited capacity
- No more migrations or refresh cycles
- Compatible with all operating systems

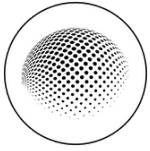

3 Protect

## HyperSTOR Platform

HyperSTOR provides a comprehensive data platform which seamlessly integrates all the essential storage, network, and compute capabilities needed to run workloads at any scale. What sets it apart is its unmatched flexibility and total control over any hardware asset from any vendor, regardless of the deployment model chosen. Whether using a tiered architecture with dedicated StratiSTOR (storage) and StratiSERV (compute) layers, a hyperconverged setup that unifies them into a single platform (HyperSTOR).

- Hardware Agnostic
- AI-Ready
- Highly Scalable
- One Interface for both Storage and Compute
- Cost Effective

**By decoupling data from hardware, you can maximize performance and get the most out of your investments.**

**Deploy on...**

**any combination of hardware**

**Complete Flexibility over...**

**costs and performance**

### **Rapid Deployment**

With our software, we can rapidly deploy all three of our products. You'll be up and running with next-generation architecture within a few hours, ensuring seamless integration and optimal performance.

Maximizing your potential from bare metal to cloud to the edge.

In today's data-driven business environment, efficient, reliable, and scalable data solutions aren't just a luxury—they're imperative. The legacy tools you rely on today likely won't take you where you need to be tomorrow. Our solutions are built for the future, offering freedom of choice and flexibility to maximize your infrastructure investments. We're transforming how businesses manage vast amounts of data, ensuring continuity, performance, and scalability every step of the way.

Wherever you need to go in terms of performance and scale, our software will take you there.
